FY 2023 Restatement Reasonings

- 1. FY 2023 restatement for Scope 2 GHG emissions (location-based method). In FY 2024, we made a methodology change to emissions wherein location-based emissions have been slightly adjusted reflecting the emission factors from the 2023 IEA emissions report.
- 2. FY 2023 restatement for network waste recycled. The figure has been restated to ensure better alignment with our reporting methodology. These include the correct classification of network waste recycled.
- 3. FY 2023 restatement for Scope 3 GHG emissions. In FY 2024, Vodafone completed a review of our Scope 3 emissions for FY 2023. This was undertaken to improve our data guality and estimation approach alongside the need to reflect portfolio changes and latest developments in industry standards and emission factors.
